Fine Jewelry and Accessories Labeling Solutions

Accessorize your merchandise with quality barcode and RFID tags and labels

The right accessories can make or break any outfit, that's how we feel about tags and labels. Having the right Service Bureau provider can improve efficiencies throughout your supply chain and enhance inventory management practices from distribution all the way to your stores!

FineLine Solutions

- Standard and custom tag and label formats with various shapes and sizes: rectangular, circular, rattail, and barbell to meet your creative and branding needs.
- RFID and non-RFID integrated tickets, tags and labels
- Legible small print and quality barcode printing with 4-color process capabilities
- Secure and durable label material constructions that protect variable data and branded logos during repeated customer handling and assures label stays affixed to merchandise.
 - Specialized adhesives so no residue is left behind
 - Price perforations for gifting purposes
 - Custom formats - from the very small label applied to a pair of earrings – to the very large Fact Information tag for handbags.

FineLine Advantage

When labels are applied directly to hard to tag merchandise, you need more options than large traditional hang tags designed for apparel. The industry leading solutions from Data2, A Division of FineLine, provides that balance between small, easy to read labels that can withstand the rigor of repeated handling and ultra-sonic cleaning, while never losing its merchandising appeal!

Why FineLine

- FineLine works with 50,000+ vendors world wide ordering tickets for 350+ retailers, and has established and maintained a reputation of quality service within the ticketing ecosystem.
- Next day standard production timeframe.
- Strategically located production hubs for product consistency and delivery to vendors within an average of 5 days.
- Team of dedicated customer service specialists assigned to each account, empowered to provide same-day problem resolution
- Order placement via FASTrak, our web portal provides fast, easy, accurate order placement and on-demand visibility to PO data, order status, and analytics
